DR. K.N. BALASUBRAMANYA MURTHY,
Vice Chancellor, PES University

Engineering educators need to be well connected to industry to understand how technologies are changing the way engineering organizations work. They should be able to quickly understand and change the curriculum to incorporate the changes needed. We should move away from syllabi that hasn't change for decades. We have to move away from 'big changes' after a 'long time' to 'small incremental changes' done 'continuously'. Structural and process changes are needed to achieve this in addition to industry interaction. Institutions will need more autonomy to quicken changes, more funds for more frequent faculty-skill upgrade and industry-integrated curriculum
